EDUCATION

Bachelor of Technology in Electronics and Communication Engineering August 2024- May 2028
National Institute of Technology Hamirpur (top **25/800** students in batch) **CGPA: 8.63/10.00**
Relevant Coursework: Operating Systems, Data Structure and Algorithm, OOPs, Computer Networks, DBMS

EXPERIENCE

SYNTECXHUB - Backend Development Intern ([credentials](#)) April 2026 – May 2026

- Developed and optimized **5+ REST APIs** and backend modules, gaining hands-on experience in API development, server-side logic, database operations, and application performance optimization
- Collaborated on **2+ real-world projects** using Git/GitHub workflows, backend architecture. Optimized back-end applications and RESTful APIs using Node.js, improving and reducing execution time by up to **30%**

CSEC(Computer Science & Engineers Community) - Secretary May 2025 – Present

- Competitive Programming Lead - Leading the Competitive Programming division of CSEC, mentoring **30+ members**. Organized the competitive programming contest **CODEARENA** with **100+ participants**.
- External Affairs Lead - Managed sponsorships and partnerships for CSEC , **HACKSECURE'26** (March 10-11), a mobile security hackathon sponsored by ISEA Phase -III (Meity,Govt. of India), with 500+ participants

PROJECTS

NewsFlow ([Android](#)) ([Backend](#)) **Kotlin, Spring Boot, Jetpack Compose, Firebase, PostgreSQL**

- Built a **full-stack news platform** with Kotlin + Jetpack Compose Android client and Spring Boot REST backend, applying **MVVM + Clean Architecture** across **6+ screens** with Firebase Authentication via secure **JWT token-based** sessions
- Deployed **5 REST endpoints** on Render.com via Docker delivering **1,000+** articles via Retrofit + Paging 3, with **60%** faster loads through Room Database caching and favorites synced to PostgreSQL

ResuMatch-AI ([Github](#)) **Python, Streamlit Cloud, spaCy, scikit-learn**

- Built and deployed "ResuMatch", an **AI-powered** resume analyzer processing **1000+ words** per resume with **95%+ skill** extraction accuracy and less than **2000ms response time** for real-time similarity scoring
- Integrated TF-IDF cosine similarity, NER, and custom regex to deliver real-time match scores, keyword insights, and skill gaps across 10+ sections via a secure, responsive Streamlit app used by **100+** users

SKILLS

Languages: C/C++, Kotlin, Java, Python, SQL
Android Development: Android SDK, Jetpack Compose, XML, MVVM, Paging 3, Retrofit, Firebase
Backend: Spring Boot, REST APIs, PostgreSQL, Docker, MySQL, Gradle
Frameworks & Libraries: Streamlit, scikit-learn, spaCy
Tools: Git, GitHub, Android Studio, Postman, Linux, IntelliJ IDEA
Competitive Programming: Data Structures, Algorithms

ACHIEVEMENTS

- Solved **900+** Data Structures and Algorithms problem across coding platform
- **Winner** of the **HackOn with Amazon 6.0 Student Builder Challenge** on AWS Builder Center
- Selected Contributor for **Open Source Connect India 2026**, a open-source collaboration initiative
- **Ranked 874** in Codeforces **ICPC NERC 2025-2026** (Northern Eurasia Finals, Online Mirror)
- Active Codeforces participant with a rating of **1328 (Pupil)**
- Achieved 1st place in AlgoWar (GDG NITH) by designing an optimal algorithmic solution
- Received on-chain credential at **ETHSF Hackathon 2025** for Quadratic Voting participation ([View Certificate](#))
